TBC

Norwich Interventional Radiology

Image Guided Intervention-for beginners

This one-day course is aimed at ST1-3 trainees in radiology

Our course is run by a group of experienced interventional radiologists and involves observing live cases, and attending practical sessions and short talks. This is also a great opportunity for trainees to ask questions on how to get into IR.

What we cover?

- Observing a live/ recorded case
- Case-based simulator experience in endovascular procedures
- Hands-on US-guided procedures using phantoms
- Discussion of tools and kit used in image-guided procedures.
- Short talk and discussion on how to get into IR
- Guest speaker session
